

DISPOSAL OF MATERIALS IN THE WASTEWATER COLLECTION SYSTEM (SEWER)

With toilet paper being scarce, the Town of Wise requests that residents refrain from flushing anything other than toilet paper down the sewer lines. Wipes, paper towels, napkins, facial tissues, and even items labeled “flushable” do not disintegrate quickly, often cause blockages in sewer lines (both public and private), and serious problems in the wastewater treatment process. Avoid the added expense of plumbing service call. Please place these items in a trash bag for solid waste disposal. Do not flush this material into the sewer collection system. If you have questions, please contact the Town of Wise Utilities Superintendent at 276-328-6119.
